## DETAILED ACTION

### *Specification*

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because line to contains the implied phrase "is disclosed", and the abstract contains more than 150 words. Correction is required. See MPEP § 608.01(b).

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Burdette (US4596713).

Burdette discloses an expandable microwave package comprising a bag (5) with first (11) and second (12) walls wherein bag is collapsed before heating and expanded after heating

Art Unit: 3742

(column 4, line 50), a coupler (13) bonding the walls together, a circular aperture (25) within the periphery of the coupler and with the coupler and the first and second walls preventing communication with the bag interior before heating with the coupler partially releasing bonding allowing communication with the interior during heating (column 9, line 54-column 10, line 8), and pleats (14) connecting the first and second walls.

### *Conclusion*

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shawntina Fuqua whose telephone number is (703) 305-2581. The examiner can normally be reached on Monday-Friday 8-4:30 pm.
